

PRESS RELEASE

WM-data and STRAKT sign Letter of Intent for e-business solution

Gothenburg, Sweden November 04, 2004 – The Raindance Business Unit in WM-data Cross Industry Solutions AB and AB Strakt have signed a Letter of Intent to collaborate on a solution for procurement support and e-business. STRAKT™'s product CAPSupphandling™ integrates with WM-data's Raindance buyers' portal ("Anskaffningsportalen" and "Fakturaportalen") in the framework of WM-data's Raindance concept.

CAPSupphandling™ is one of the tailored applications built on CAPS™, STRAKT™'s flexible real-time integration and information platform. CAPSupphandling™ supports the procurement process from the initial idea, through the tender process, to the contract completion with the supplier. The contract is linked with Raindance's buyers' portal, a solution for electronic buying, all the way to and including handling of invoices.

"By integrating CAPSupphandling™ into the Raindance concept we can offer our customers unprecedented support for the complete road to purchase; from collaborating on refining the very first ideas all the way to the invoice", says Mats Dahl, Application Manager Raindance at WM-data. "A module to support the procurement process has been missing in the Raindance e-business concept. We have seen a strong market need for this, and we are looking forward to presenting the whole solution to our customers at the Raindance User Conference in November."

"We are very excited to work with WM-data to offer customers a more complete package for e-business", says Per-Åke Olsson, CEO of AB Strakt. "Integration with Raindance will give us the opportunity to introduce CAPSupphandling™ to WM-data's large Raindance customer base", he continues. "This is in concordance with our long term strategy to find strong partners who can provide competitive business process solutions encapsulating CAPS™."
